Project Design Phase
Problem – Solution Fit Template

Date	25 MARCH 2026
Team ID	69c0f43a1466f700a6d30fcf
Project Name	AUTOMATING EMPLOYEE DATA
Maximum Marks	2 Marks

Problem Statement

- **Employee data is stored manually (paper / Excel)**
- **Difficult to manage and update records**
- **Time-consuming process**
- **High chance of errors and data loss**
- **No proper security for employee information**

Target Users (Customers)

- **HR Department**
- **Company Admin**
- **Small & Medium Businesses**

Existing Situation

- **Manual data entry**
- **No centralized system**
- **Hard to search employee details**
- **Data duplication and mistakes**

Proposed Solution

- **Develop a web-based system**
- **Store employee data in database (MySQL)**
- **Provide login system for security**
- **Features:**
  - **Add employee**
  - **Edit employee**
  - **Delete employee**
  - **View employee list**

Problem–Solution Fit

- System reduces manual work
- Improves accuracy of data
- Saves time for HR/Admin
- Provides secure data storage
- Easy to access and manage

Benefits

- Faster data management
- Better organization
- Improved efficiency
- Secure and reliable system
